

Task 1 Help Us

Hello there,

Start Machine

I am the CEO and one of the co-founders of futurevera.thm. In Futurevera, we believe that the future is in space. We do a lot of space research and write blogs about it. We used to help students with space questions, but we are rebuilding our support.

Recently blackhat hackers approached us saying they could takeover and are asking us for a big ransom. Please help us to find what they can takeover.

Our website is located at <https://futurevera.thm>

Hint: Don't forget to add the 10.67.140.31 in /etc/hosts for futurevera.thm ;)

Answer the questions below

What's the value of the flag?

Answer format: ****{*****}

Check

Add <https://futurevera.thm> to hosts file

```
(math@kali)-[~/Desktop]
$ sudo nano /etc/hosts
```

```
10.67.140.31    futurevera.thm
```

Nmap scan to see which ports are open

```
(math@kali)-[~/Desktop]
$ nmap futurevera.thm
Starting Nmap 7.95 ( https://nmap.org ) at 2026-03-06 22:04 MST
Nmap scan report for futurevera.thm (10.67.140.31)
Host is up (0.059s latency).
Not shown: 997 closed tcp ports (reset)
PORT      STATE SERVICE
22/tcp    open  ssh
80/tcp    open  http
443/tcp   open  https
Nmap done: 1 IP address (1 host up) scanned in 2.25 seconds
```

Fuzz subdomains with ffuf:

```
ffuf -w /usr/share/seclists/Discovery/DNS/bitquark-subdomains-top100000.txt -u
http://futurevera.thm/ -H "Host: FUZZ.futurevera.thm" -fw 1 -t 100 -mc 200
```

```
Progress: [5894/100000] :: Job [1/1] :: 1479 Req/sec :: Duration: [0:00:04] :: Errors:
payroll [Status: 200, Size: 70, Words: 9, Lines: 2, Duration: 64ms]
```

```
portal [Status: 200, Size: 69, Words: 9, Lines: 2, Duration: 91ms]
```

Add those subdomains to the hosts file

```
portal.futurevera.thm
payroll.futurevera.thm
```

```
10.67.140.31 futurevera.thm payroll.futurevera.thm portal.futurevera.thm
```

On HTTP these subdomains are only available via internal VPN and through HTTPS it just directs to the main page.

I had to re read the challenge to realize the blog is rebuilding the support page, so I added support.futurevera.thm to my hosts file and visited that subdomain.

We get the warning

Warning: Potential Security Risk Ahead

Firefox detected a potential security threat and did not continue to **support.futurevera.thm**. If you visit this site, attackers could try to steal information like your passwords, emails, or credit card details.
